

I am horrified with how the NAB is trying to restrict free speech. Our country has always prided itself for being innovative. XM Radio has improved the way we get our traffic reports. I listen to the Boston area traffic reports every workday. I get up to minute reports on the routes I take to work. It is the most useful commuting tool in years. Let's not kill innovation because some media giants may have to drop their 60 seconds of airtime when they cover traffic. What is more disturbing is that I pay for this service. So why is the NAB so concerned?
